Fort Good Hope, Northwest Territories, District of Mackenzie [cartographic material] / Geological Survey of Canada, Department of Energy, Mines and Resources ; compiled by J. A. Code from information collected in 1971

Geological Survey of Canada, Open File 3260g. National Geochemical Reconnaissance, Labrador compilation: distribution of mercury in 18 716 lake sediment samples and 1159 stream sediment samples, Newfoundland Labrador.

Seismic shothole drillers' lithostratigraphic logs: Unearthing a wealth of regional geoscience information in northwestern Canada

Headwaters Margaree River sheet 8.

Sedimentary record of glacial Lake Mackenzie, Northwest Territories, Canada: Implications for Arctic freshwater forcing

Regional lake sediment and water geochemical reconnaissance data, Ontario.

The Mackenzie River system

Geological Survey of Canada, Open File 557. The fusulinids reported from these thick deposits include Fusulina or Fusulinella which are indicative of a Moscovian Middle Carboniferous age. The watercourses of this section of country have been most inadequately represented on the existing maps, owing to the lack of knowledge of their positions, and a reference to the map accompanying this report will be necessary in order to understand the apportionment of the watersheds among the various rivers.

The Mackenzie River system

Also 109-D Province of Ontario, showing counties, townships, rail ways and post offices. Reconnaissance-scale till survey in the New Liskeard-Temagami region, Ontario: kimberlite indicator minerals and geochemistry.

Full text of of the maps in the collection of the Geographic board. List of the maps cor. to 1st January,

Wordie ascertained the presence of fossiliferous Triassic deposits in the Cape Stosch region within central East Greenland. The sign f before a number indicates that the map is not shown on the index sheet. Geological Survey of Canada, Open File 413.

Surficial Geologic Map of the Pocasset
