### Basic Economics

By offering a bonus for the number of bottles produced, the owner made it beneficial for the competing shifts to gain an advantage by only bottling the smaller bottles. You actually start to see how they might actually make things worse.

### A Review of Basic Economics by Thomas Sowell

Change in any variable which can be measured over a period of time relates to a flow. For investment projects like highways and schools, governments sell bonds, go into debt, and essentially push the cost onto future generations who will benefit from the investment. Perfect competition assumes that no seller is large enough to sway the natural movement of the market owing to its large market share and cash reserves, which too often becomes the case for corporations in a capitalistic system with the wherewithal to wipe out smaller players.

### Basic questions of economics

Individual Wealth: Wealth owned by an individual is called private or individual wealth such as a car, house, company, etc.
