Russian Sleep Experiment (The 1940s)

Much of the online and offline debate surrounds the belief held by many that the story is real rather than fiction, and many articles therefore seek to debunk this claim. The creepypasta is often shared alongside an image of a grotesque, demonic figure, which is implied to be one of the test subjects.

Russian scientist contracts COVID

Demikhov explained that the dogs were part of a continuing series of experiments in surgical techniques, with his ultimate goal being to learn how to perform a human heart and lung transplant.

Soviet Scientists drilled into hell

In one diary entry dated shortly before the changeover, the historian Ivan Ivanovich Shitz wrote disparagingly about how the nepreryvka would kill off Sundays and all Christian holidays, he wrote, and make it impossible for people to meet in groups, whether union-based or political, or as a family. The host-dog was bored by all this, but soon became reconciled to the unaccountable puppy that had sprouted out of its neck. After recovering, he took a test that revealed the presence of antibodies, the outlet reported.

Why Does Russia Have a Secret ISS Experiment?

Quarterly dynamic complex studies included measurement and recording of blood pressure and complex cardiorespiratory parameters during the performance of functional tests with physical, mental and orthostatic load. When the commander orders the two subjects to be sealed inside the chamber with 3 researchers, one of the latter shoots the commander dead before repeating the actions upon the fourth test subject.

10 Shocking Soviet Experiments

On the 15th day, the researchers decided to turn off the stimulating gas and reopen the chamber.
