### Pregnant? Don't Overlook Blood Clots

Early treatment can help prevent a DVT from breaking off and traveling to the lungs as a PE.

### Pregnant? Don't Overlook Blood Clots

Use the and discuss it with your doctor.

### Safe Motherhood Initiative

The Sickle Cell Data Collection SCDC program collects health information about people with sickle cell disease SCD to study long-term trends in diagnosis, treatment, and healthcare access for people with SCD in the United States.

### Sickle Cell Data Collection (SCDC) Program

The risk factors for vascular diseases can vary, depending on the specific disease.

### Pregnant? Don't Overlook Blood Clots

The program helps to inform policy and healthcare standards that improve and extend the lives of people with SCD. The Safe Motherhood Initiative focuses on the four leading causes of maternal death: maternal sepsis, obstetric hemorrhage severe bleeding, venous thromboembolism blood clots, and severe hypertension in pregnancy high blood pressure.

### Sickle Cell Data Collection (SCDC) Program

If you do need to sit all day, get up and move around every hour or so. Pregnant women may also experience less blood flow to the legs later in pregnancy because the blood vessels around the pelvis are pressed upon by the growing baby. Why are pregnant women at higher risk for a blood clot? The walls of the capillaries are thin and leaky, to allow for an exchange of materials between your tissues and blood.
