Geriatric Assessment Tool Kit

Additionally, incontinence is often a key deciding factor for nursing home placement.

Geriatric Physical Diagnosis A Guide To Observation And Assessment PDF Book

Vision loss is common among older adults in the United States, affecting 12% of those 65 to 74 years of age and 15% of those 75 years and older. It includes an extensive review of prescription and over-the-counter drugs, vitamins, and herbal products, as well as a review of immunization status.

Assessment of older people 1: definition, principles and tools

New York, NY: American Geriatrics Society; 2016. Isr J Health Policy Res.

Geriatric physical diagnosis : a guide to observation and assessment : Williams, Mark E : Free Download, Borrow, and Streaming : Internet Archive

Screening for hearing impairment in older adults. UCLA Division of Geriatric Medicine.

Evaluation of the Older Adult

Safety is paramount, and a clinician doing the Romberg test must be in position to prevent the patient from falling.

Gait disorders in adults and the elderly : A clinical guide

Older adults who unintentionally lose 5% or more of their body weight in six months or have a low BMI require further evaluation for poor

nutrition.

The Geriatric Assessment

Although basic gait assessment adds little time to the examination, it yields information that has impact on independent function and guides consultation with rehabilitation professionals see.
