Theory of constraints (TOC)

His research interests include state-dependent pricing models, environmental economics, coordination games, and consumer boycotts.

What is Short

Content Accuracy rating: 4 The text is unbiased and thoughtful in explaining a range of perspectives from the discipline and even how and why economists disagree.

Managerial Economics (Chapter 6)

They utilize decision trees and make assumptions about weather forecasts to decide which crops to plant. For instance, various transportation capacities along each link could be analyzed by proportionately varying the width of the link, and a scenario where certain roads were unusable could be analyzed by simply removing the corresponding links to see what the ants would then do.

Focus Improvement on the Manufacturing Constraint

He was elected Fellow of the Econometric Society in 1997.
