No further evaluations were performed after 30 minutes.

## Lune Buscon

In the first phase, the drug was administered intravenously at dosages of 1, 3, and 5 times the recommended level 30, 90 and 150 mg per 100 kg body weight once daily for three consecutive days. This can lead to bleeding, frequent diarrhea, bloating, flatulence, cramps and stomach pain. Eventually, it will help you to go about your daily activities more easily and have a better, more active, quality of life.
