Journal of Development and Agricultural Economics

Agriculture has witnessed a consistent decline in its share from about 48 percent in the second half of 1980s to 35.

JENNY Frédéric

Agroforestry has a role to play in both situations by making land use more sustainable and by making inhabited reserves ecologically and economically more viable. However, if one species differs in utilization of even one of the components, for example light saturation of C3 vs. Nevertheless, the findings presented in this volume can help policy makers design complementary pathways to enhance the benefits of trade liberalization for everyone.

Africa Competitiveness Report 2015

With the discovery and commercial production of oil, the composition of national output and export earnings is expected to change.

ACCRA INTERNATIONAL CONFERENCE CENTRE

Particularly in the presence of off-farm alternative, farmers divide their labor resource between irrigation farming and off-farm employment. It is to complete a circuit that takes a group from a process of knowing to doing something about what they know.
