

# Systematics of the genus *Rhagovelia* Mayr (Heteroptera: Veliidae) in the Western Hemisphere (exclusive of the angustipes complex)

Entomological Society of America - ITIS Standard Report Page: *Rhagovelia obesa*

Description: -

-  
 Korea (South) -- Social life and customs.  
 Korea (South) -- History, Local.  
 Material culture -- Korea (South)  
 Folklore -- Korea (South)  
 Sierra Leone -- Population policy.  
 Rhagovelia -- Geographical distribution.  
 Rhagovelia. Systematics of the genus *Rhagovelia* Mayr (Heteroptera: Veliidae) in the Western Hemisphere (exclusive of the angustipes complex)

-  
 Thomas Say publications in entomology Systematics of the genus *Rhagovelia* Mayr (Heteroptera: Veliidae) in the Western Hemisphere (exclusive of the angustipes complex)

Notes: Includes bibliographical references (p. 369-374).

## Influence of Local Variables and Landscape Metrics on Gerromorpha (Insecta: Heteroptera) Assemblages in Savanna Streams, Brazil

ASU , and S to Mexico: Sonora, Durango, and Jalisco.

## Biogeography Of Aquatic And Semiaquatic Heteroptera In the Grand Canyon Ecoregion, Southwestern USA

The Microveliinae are convincingly diagnosed based on their one-segmented fore-tarsi Damgaard, 2008b. Por otra parte, señala la importancia que tiene el largo de las patas medias, pues constituye un brazo de palanca largo que actúa contra la superficie del agua y alivia el esfuerzo de propulsión. Our results at the species and family level are similar to those found by Alayo 1967, 1974 , and corroborate the preference of aquatic bugs for slow current or stagnant waters.

## Biogeography Of Aquatic And Semiaquatic Heteroptera In the Grand Canyon Ecoregion, Southwestern USA

Insect Systematics and Evolution 37 3 : 335-350. Also found in Arizona: Yavapai County ASU and E to PA: Philadelphia ASU. Mangaratiba, Reserva Ecológica Rio das Pedras, bromélia, 22.

## Biogeography Of Aquatic And Semiaquatic Heteroptera In the Grand Canyon Ecoregion, Southwestern USA

Rostrum brown, with distal segment dark brown.

## ITIS Standard Report Page: *Rhagovelia venezuelana*

This study analyzed four populations of R.

## **Taxonomy and distribution of aquatic and semiaquatic Heteroptera (Insecta) from Cuba**

LEPTOPODOMORPHA Saldidae Saldia buenoi :259 Arizona: Coconino Co. Although this locality lies just S of our study area, the range of this taxon likely extends into our study area, and we have included this taxon in our diversity calculations.

### **Rhagovelia choreutes**

Combining molecular and morphological analyses of water strider phylogeny Hemiptera-Heteroptera, Gerromorpha : effects of alignment and taxon sampling. Damgaard 2008b found a sister group relationship between Potamometropsis and Potamometroides and between Ptilomera and Rheumatogonus. No se trabajó con hembras por las diferencias en tamaño y forma que presentan debido a la edad y estado de gravidez , lo cual podría afectar las medidas morfométricas e influir al hacer la comparación con las demás poblaciones.

### **Variation in the diversity of semiaquatic bugs (Insecta: Heteroptera: Gerromorpha) in altered and preserved veredas**

Bragança : 1 apterous male DZRI.
