Rainforest Animals

An ecosystem is the dynamic interaction between living and nonliving things. Rainforest AnimalRead More I have a thing for rainforest animals! A biotic factor is a living organism that shapes its environment. Wealthy nations drive demand for products, and economic development increases energy use.

Rainforest

Use these classroom resources to help students explore and learn about these places. Some tribes have had little, if any, contact with outside civilizations, while others seek to legally protect the lands on which they live.

Rainforest Ecosystem

Vines have tendrils, spines or twining stems to help them climb up to reach the sunlight.

12 Rainforest Ecosystem ideas
