Land Use Principles for Georgia

But city councils and their constituents have been cautious when it comes to giving up local control over zoning decisions, often mounting significant opposition to state-level abundant housing solutions. This article surveyed landowners in 15 U.

Farmland Protection

The objective of planning land use is to influence, control or direct changes in the use of land, so that it is dedicated to the most beneficial use, while maintaining the quality of the environment and promoting conservation of the land resources. Zoning should not be considered as the end in itself, but only as a means of approximation in relation to geographical reality.

Zoning and Land Use Planning

Preserving Large Landscapes This Planning article explores the differences between agricultural land preservation strategies in eastern and western states. This report examines legal questions around adopting agricultural zoning as a means of protecting the agricultural industry and existing preserved farms of the township.

Land

Land use policies such as growth controls and zoning and other government regulations have a substantial impact on both housing and labor markets in metropolitan areas. . It is time to resource these leaders and let them bring us into a new era of restoration and redemption.

Rapid Assessment Framework

For the state, the obvious concern is whether the abundant housing incentives could drain state dollars into local coffers. There should be no illusions, however; the barriers to success are many.

Corey Johnson Proposes New Land Use Plan

Facts about Georgia land use: Georgia, the largest state east of the Mississippi River, covers approximately 57,000 square miles, or 37.

Corey Johnson Proposes New Land Use Plan

This JAPA article evaluates how well the technique of cluster zoning fits in with overall farmland protection methods.

NYSDOS Division of Local Government Services

They often complain that their options are limited when developers pitch projects, especially when there is an as-of-right alternative that the member deems unacceptable. Putting uses in close proximity to one another has benefits for transportation alternatives to driving, security, community cohesiveness, local economies, and general quality of life issues. It is becoming more widely understood that any sector of land has a certain capacity for supporting human, animal, and vegetative life in harmony, and that upsetting this balance has dire consequences on the environment.
