Automating the Fight Against Financial Crime

At EY, we believe in humans plus a virtual workforce: augmenting the power of your human workforce with a set of automation tools is a powerful workforce-multiplier. For example, more ice cream and sunscreen are sold in the summer.

How intelligent automation can transform wealth and asset management

Intelligent automation can help to reduce the risk of such breaches — through the combination of OCR, NLP, machine learning and RPA to scan, read and extract relevant information from IMAs, and transpose this relevant information into compliance rule coding screens, in an accurate and risk-free way. In addition to simplifying the process, automating cycles reduces the risk of errors and fraud, ensures compliance and speeds decision-making by providing data in near real time.

How Automated Risk Software helps Startups challenge global firms

The AI-first bank of the future will also enjoy the speed and agility that today characterize digital-native companies.

32 Business Automation Statistics for 2021

In fact, a survey by Robert Half, a global human resources consulting firm, found that nearly one quarter of respondents expect to automate processes behind financial forecasting.

32 Business Automation Statistics for 2021

For startups and innovative challengers, the risk of never recovering are extremely real. For starters, automating the finance function may be enticing conceptually, but benefits can be elusive. Intelligent automation is a multi-faceted concept.

Financial Management Software

We strive to provide individuals with disabilities equal access to our website. The best financial management platforms on the market support

advanced features for greater visibility and insight as well as cloud connectivity for access anytime, anywhere. Honesty and transparency are critical.
