Acculturation and Depressive Symptoms in Korean Immigrant Women

Social support as coping assistance.

Acculturation and Adaptation Among Immigrants and Refugees

Although many immigrants held their ethnic identity in higher esteem than their national identity, it was discovered, through the ICSEY project, that immigrant or refugee adolescents respected their national identity in nations that have experienced immigration more than nations that have only recently experienced immigration. Findings from this paper support the importance of mental health service provision to immigrants, which was recently one of the main focuses of the first ever mental health strategy for Canada, prepared by the Mental Health Commission of Canada. Further analysis is required to explain these results fully.

Acculturation and Immigrant Children: Implications for Educators

The process of immigration and settlement is inherently stressful Levitt et al. The Journal of Criminal Law and Criminology, 72 2 , 818—838. Specifically, these mechanisms refer to the mediating and moderating effects of social interaction and social connectedness with host nationals upon the acculturation—adjustment linkages.

Acculturation and psychosocial adjustment of Chinese international students: Examining mediation and moderation effects

This paper focuses on the sample of the approximately 7,700 immigrants weighted population: 157,600 that were interviewed over all the three waves of the LSIC. There are multiple barriers to accessing the medical system that immigrants may face after arrival in Canada. A prevalence study on partner abuse in six Asian American ethnic groups in the USA.

Mental health and well

I go to places where people are American.

Acculturation and psychosocial adjustment of Chinese international students: Examining mediation and moderation effects

Also, immigrants living in British Columbia not Quebec were significantly less likely to experience high levels of stress than those living in Ontario. These findings suggest that acculturation might increase insulin resistance through yet another pathway. *Women and Therapy*, 9, 129—159.
