Infamous Serial Killers Undone by Forensic Evidence

. Chemical tests of various kinds are used for ink comparisons.

Police

Cold Case Murder of Krystal Beslanowitch, 1995 : Solved through forensic technologies. The breakthroughs and innovations that we uncover lead to new ways of thinking, new connections, and new industries.

The grisly history of forensics

The formula for nicotine is a straightforward: C₁₄H₁₀N₂. And in that time period, he managed to figure out a method using ether, acetic acid and ethanol for preservation, that enabled him to extract the oily liquid of nicotine from the preserved tissues. What do we do with this dangerous thing that courts have been relying on since time immemorial, that we need to be able to rely on, even when it proves so fleeting? Parabon is currently working on a small test of its methodology with Bruce Budowle, head of the University of North Texas Institute of Applied Genetics and a former DNA expert for the FBI.

Police

The murder of Patricia Beard, 1981 : Solved through DNA evidence.
