Can L

MitoPark mice treated with saline or L-DOPA and saline-treated control littermates were tested on days 3 short-term and 16 long-term of treatment.

Side effects of L

Individual articles are based upon the opinions of the respective authors, who may retain copyright as marked.

Effects of repeated administration of l

By using technology to, in effect, turn off dopamine production and see what happened, they discovered that mice don't need dopamine to connect behavior with rewards or to find the rewards satisfying.

l

The men were given 5 grams of mucuna pruriens powder a day for 3 months. Thus, l-DOPA is used to increase dopamine concentrations in the treatment of and.
