Drugs in sport

The committee uses both blood and urine tests, and should a scandal arise, is open to using other testing items, such as hair.

Drug Use in Sports

If you or anyone you know is undergoing a severe health crisis call a doctor or 911 immediately.

Drug abuse in athletes

Adolescent athletic participation and nonmedical Adderall use: an exploratory analysis of a performance-enhancing drug. However, synthetic versions have become very popular within the world of sports. And in many cases, there is little care given to.

Drugs in sport

HBOCs are not only great at tissue oxygenation, they can deliver increases in blood serum iron, ferritin and naturally occurring EPO. Some studies have found evidence of early mortality due to cancer or heart attack amongst previous long-term users of PEDs, but these are inconclusive as other factors such as lifestyle, and genetics may also be responsible.

The Use of Performance

The IOC banned blood doping in 1986.
