### cyrillic

The original spelling here was neamhchuisseach.

### irish

The CO only has the latter, spelt as tinn. Found as leac oighir; see under leac.

### cyrillic

The CO spelling of the verbal noun is highly in appropriate, given that the traditional spelling was léigheadh, and so the verbal noun has been truncated in the spelling here to indicate the pronunciation better. Below, I opt for the visually simpler alternative. Masculine here, but feminine in the CO.

### cyrillic

The genitive is leapan and the nominative plural leapacha. The variant spellings appear to indicate that PUL had a slender t, while occasionally lapsing into the accepted spelling with a broad t. Other members of the community cannot see it.

### cyrillic

It seems likely that the myth of the cyclops evolved with a similar function. PUL uses both tiomáint and conáint in his works, but tiomáint is the form found in the CO.

### Foclóir do Shéadna

The LS transcription dair fie indicates that the r may become slenderised by assimilation to the f. This choice is available in any phonemic writing system.
