Angel Pavement by J.B. Priestley

Musically this one's always reminded me of something Davy Jones and the Monkees might have recorded when they were starting to spread their artistic wings. Good story, a con man totally messes up an odd little veneer business staffed by hopeless subordinates. The edgy dinner party given by the businessman to the rather shady braggart who claims to put the entrepreneur's business back on the map.

Imagine a good Graham Nash-era Hollies tune and you'd have a feel for what this one sounded like.

Angel Pavement (1967 TV series)

Candler went on to join Decameron and the John Coppin and his band, and Shepherd wrote songs and attempted to do a musical adaptation of The Wind in the Willows, while the others exited the business altogether. Are you looking for a novel that you can really get your teeth into this summer? I read this a long time ago, so won't rate it.

'Angel Pavement ' by J.B. Priestley

Contracts were drawn up, the band turned professional and after a few tracks had been put down at Morgan AP departed for Mexico where they were extremely successful. Excellent book, one of Priestley's best, about life in late 1920's, early 30's London.

The 1969 Wind in the Willows project was finally released on CD in 2009, digitally remastered with extra demo songs, on the Wooden Hill label.

B

I was nearly in tears when he tried to gas himself and realised he didn't have the money to pay for it, and when he finally hooks up with Poppy and realises the girl of his dreams was under his nose all along, so touching. The middle decades of the twentieth century, which he has helped to shape,

come alive in this tracing of their fictional recreation by Priestley. It's address is a street called Angel Pavement, hence the name of the book.
