Chapter 1 at play.fridaynightfunk.rf.gd

The CymatophOPas are by no means as easy to determine. This study also presents a sharing of characters of the thorax and abdomen between the Acraeini and Mechanitini Bizarro et al. Gosse had published an illustrated monograph of the Papilionidae in the transactions of the Linnaean Society for 1883.

Catalog Record: The genitalia of the British rhopalocera and...

I also particularly wish to acknowledge my debt of gratitude to my friend the Rev.

The genitalia of the group Tortricidæ of the Lepidoptera of the British Islands : an account of the morphology of the male clasping organs and the corresponding organs of the female

Harpe simple, the armature being only indicated by a thickening of the skin ; uncus sickle form, stouter in the middle ;. Towards a better understanding of the higher systematics of Nymphalidae Lepidoptera: Papilionoidea. This band separates regions with different degrees of sclerotization, with less sclerotization in the area closest to the foramen.

Full text of genitalia of the group Noctuid of the Lepidoptera of the British Islands. An account of the morphology of the male clasping

Harpe tapered to a point, elbowed ; clasper a curved club ; uncus tongue shaped, from the upper side of which arises a small peak ; aedreagus

sparingly dentated at the orifice.
