:39-43. Westling 1984 Roles of glabrous skin receptors and sensorimotor memory in automatic control of precision grip when lifting rougher or more slippery objects. We consider the optimization of the dose distribution using as objectives the variance of the dose distribution on the PTV surface and in the PTV calculated at 1500 — 4000 positions sampling points.

Conference Papers

The three layer architecture well supports the integration of different modules to form a complex system which can execute a wide variety of different tasks.

Wearable lower limb robotics: A review

Prabhu , Srikanth and Hegde, Govardhan and Mungle , Tushar 2013 In: Proceedings of RETCOMP - 2013, Dept of CSE, PESIT, Bangalore South Campus. Does the proprioceptive system play a role? In this case the evolutionary algorithms can not reach these regions whereas deterministic algorithms using information from local gradients are guided into these regions after only 10-20 iterations.
