Determinants of Weekly Work Hours in Canada

Based on observational data collected at 15 levels on a 325 m meteorological tower in Beijing during 1991-2011, changes in wind speed, vertical profile, aerodynamic roughness length z_0 , and zero-plane displacement height z_d were analyzed.

CiteSeerX — Work Hours in Canada

We investigated vertical activity profiles of a bat assemblage, and their relationships to wind speed, within a major valley of the European Alps where tall wind turbines are being deployed.
