How to Set Up the Math Center in an Early Childhood Classroom

Because the theme is always changing, my class always gets excited when they see this activity in the math center tub.

How to Set Up the Math Center in an Early Childhood Classroom

This center provides the perfect opportunity for that. Math Centers 1-8 are all part of my You can see that Kindergarten Math Centers 9: Dough Center Lots of different skills are practiced at this center! Thanks for reading to the end! We dropped the pasta into the containers with egg dye for 10 minutes and then laid it on paper towels to dry.

Hands

Students keep going until there are no cards left. Every week I plan and put out one or two new items in each center in my classroom. Just search vocabulary over in the search bar on the right.

Hands

Then program them to be any set of numbers you wish. Learn shapes in the tub with these foam sticks! There are even free sites that students can access from home such as , , and.

12 Fun Kindergarten Math Centers and a Free File

This is a form of a math warm-up that can be used for any of the math categories. The cards provide criteria for pattern creation but allow students to create with the blocks of their choosing.
