Town Tours and Village Walks

Requests the World Heritage Centre, in close collaboration with the Advisory Bodies, to pursue the study of the revision of the Operational Guidelines, to integrate sustainable development, and to further consider these matters within the framework of the reflection on the Future of the Convention; 7. Are there things that they should know best practices, for instance, or the results of research on the issue? Why, then, is it worth it to policymakers - who usually have the ability to impose their own plans - to involve the community in social planning and policy change? Read the research and literature about social change policy and inclusive, Learn what other communities have done, search the web for best practices, etc. The federal, state, or local government may decide to appropriate funds for a specific purpose, for instance, or a large foundation might turn its attention - and financial resources - to a specific issue.

The Heritage Foundation

Experience has shown how the degradation of natural resources, neglected rural areas, urban sprawl and poorly engineered new constructions increase the vulnerability of communities to disaster risks, especially in poorer countries. The meeting was organised jointly by the German Federal Agency for Nature Conservation BfN with its International Academy for Nature Conservation, IUCN, ICCROM and ICOMOS, in cooperation with the World Heritage Centre. It does mean, however, that they generally have the best perspective on what their lives are like in relation to those problems and issues, and on what actually happens in the community.

Chapter 5. Choosing Strategies to Promote Community Health and Development

Traditionally, this has meant that policymakers decided what they thought was good for a community or a population, and imposed policy that was meant to bring about the results they wanted. Although policymakers are usually public officials, that is not always the case. What is effective or appropriate today may not be in five years.

World Heritage Centre

All the ideas and recommendations formulated in the context of the 40 th Anniversary, in fact, have not yet found their way into the policies of the World Heritage Convention, and thus have not become mainstream practice for nearly 1000 of the most outstanding heritage properties around the

planet and, even more significantly, within the national heritage policies that — in many countries — are inspired by the standards set by the 1972 Convention. As discussed briefly above, policymakers can pay lip service to community participation while getting around it or ignoring it. The concrete implementation of the policy will no doubt require the building of necessary capacities among practitioners, institutions, concerned communities and networks, across a wide interdisciplinary and inter-sectorial spectrum.

Heritage Festival

This event was the first International Congress specifically focusing on the linkages between culture and sustainable development organized by UNESCO since the Stockholm Conference in 1998.
