Achievement Tests and Elementary ESOL Exit Criteria: An Evaluation on JSTOR

In comparing 9-10 year-old bilinguals to English monolinguals on tasks in English, the bilingual skilled readers scored higher on word-reading and spelling tasks than the monolingual skilled readers, although no differences were found on pseudoword reading tasks, working memory, or oral cloze tasks.

A Study of the Relationship Between School Culture and Standardized Test Scores

In other words, although older students tended to have lower mean pre-test scores, they also tended to improve more than younger students in this area over the course of the program.

California GATE Program (Gifted Education)

Published by grades K-8 This test is the predecessor to the Naglieri Nonverbal Ability Test NNAT , by the same author. Be sure to get optional subtests Information, Arithmetic, and Picture Completion for gifted kids.

Assessment for Special Education: Standardized Testing

.

Achievement measures

Developed by talent search achievement test, grades 2-6 test measuring verbal and mathematical reasoning abilities, for 2nd - 6th grade talent search participants. It is concluded that DI, especially if begun early, can be an effective means for English-speaking children to acquire functional proficiency in 2 non-native languages and that instruction in the 1st language in the beginning of the program has no long-term benefits to first-language development but may slow down second-language learning. But if he or she scored a 32, you would probably want to note the weak areas and possibly slow down on or even re-teach some of those more difficult concepts before moving on.

Stanford Achievement Tests

Federal law only permits 3% of all students to be exempted because of disabilities, and these students are required to take an alternate assessment, which can be simple; or dizzyingly convoluted. I found this to be true in my own homeschool.

Tests & Assessments

This article includes a list of general , but it remains largely unverified because it lacks sufficient corresponding. TTCT , ages 5-17 The most widely used creativity tests, for identification of the creatively gifted. Results of the study indicate that there is a significant difference between reading achievement scores of sixth-grade students receiving foreign language instruction and students with no foreign language instruction.
