Gender and Social Inclusion

In the short-run estimation, this study does not find out any significant or negative effect of climate change factors, for instance, temperature and rainfall, on agricultural output. A group that sees itself as marginalised at home might develop a stronger sense of its identity, and thereby its dissatisfaction, by observing a comparable struggle in other states.

Reality from the The poor as main agents of forest degradation: Lessons from Ashanti Region, Ghana

New York: The United Nations, September 25, 2012. Evidence from Cambodia, Lao PDR, and Vietnam. Finally and essentially, 4 the roles of global powers in the region.

An Econometric Analysis of the Nexus of Exchange Rate, Inflation and Budget Deficit: Case of Nigeria 1981

For Acemoglu and Robinson 2012:376—377 as well as for Herbst 2000:254—255 , state fragility is symbolised by extractive state institutions that expropriate power and wealth: thereby impoverish the people and block economic development, and at the same time initiate savage conflict.

Gender and Social Inclusion

However, it becomes important to mention that causal linkages between poverty and terrorism have been disproven.

Short and long

Mattei, Ugo and Laura Nader. Similarly, the results of the correlation matrix are displayed in , which shows that CO 2 emissions, temperature, fertilizer consumption and energy consumption are positively associated with agriculture.
