I find it cuts down on mess in desks, pants being cut while I am teaching and pencil crayons rolling about the floor.

## Fish Bulletin. California Department of Fish and Game — Calisphere

As it turns out, the Yellowfin wasn't the hallucination of some drunken cowboy, but an actual trout subspecies described by a pair of academics in the 1891 Bulletin of the United States Fish Commission. The only known specimens, native to three small lakes in New Hampshire, were likely the remnants of a larger population that was dragged northward by retreating thousands of years earlier.
