### Publications

Electricity supplied about 32 percent, petroleum and natural gas supplied 28 percent each, and coal contributed 11 percent. The publication presents energy data for the State of Illinois and, in some cases, for the United States.

### Illinois energy production: 1960

Petroleum, natural gas, and coal each accounted for slightly smaller shares of the total consumed in 1981 than in 1960, while nuclear power, hydroelectricity, and other energy sources, such as geothermal power and electricity generated from wood and waste, increased their shares of the total.

### Wikipedia:List of online newspaper archives

A limited number of complimentary accounts of the for-profit databases and are available to through the.

### Library Statistics

Historical data on energy consumption, production, resources, and related variables are presented to better comprehend Ohio's present energy situation.

### Public libraries

In terms of shares of total energy, the industrial sector accounted for less of the total in 1981 than in 1960, but each of the other three sectors increased its share of the total. The transportation sector was almost completely dependent upon petroleum. Data on electricity generation are included, broken down by fuel used in the generation.

### Notebooks, 1960

It is also included in Oregon Newspaper Archive and possibly other database offerings. Coverage is early 20th century to the mid-1980s.

**Public libraries**

The first edition presents historical data through 1988 and in some cases, 1989 and 1990, when available. In the final section statistics on Ohio Energy Flows are presented for petroleum production, refining and consumption, natural gas, bituminous coal, and electricity.
