## Polyesters: Characteristics and Applications

Melt-spun Fiber: The chips are dried completely. Uses of polyesters Polyesters are extremely important polymers.

### Polyester

It is also used for filling anoraks and bedding duvets to give good heat insulation. Fiber-reinforced PBT molding compound is sold under the trade-name Celanex.

## Polyesters: Characteristics and Applications

Shatterproof and cheap these bottles are an absolute boon to the beverages industry. The polymerization is exothermic and dissipation of heat through cooling may be required.

### Polyester

As films The polyester can also be made into thin films which can be used in food packaging, audio and video tapes, electrical insulation, and X-ray films. In 2000 about 3,900 million pounds of polyester fiber were used in the United States, making it the largest single fiber group material. We are the largest producer of polyester fibre and yarn in the world, with a capacity of 2.

## Polyesters: Characteristics and Applications

One house was found to be degrading by and. However, drawing it out further makes it thinner.
