### Vital Signs: MedlinePlus

**Blood pressure:** Blood pressure is the measurement of the pressure or force of blood against the walls of your arteries. Vital signs are recorded using the internationally accepted standard coding system. **Body temperature:** The average body temperature is 98.

### Vital Signs (Body Temperature, Pulse Rate, Respiration Rate, Blood Pressure)

A normal pulse rate for a healthy adult at rest ranges from 60 to 80 beats per minute.

### Vital signs: MedlinePlus Medical Encyclopedia

Multimodal monitors that simultaneously measure and display the relevant vital parameters are commonly integrated into the bedside monitors in , and the in. Philadelphia, PA: Elsevier; 2019:chap 6. Because of the risk of breaking, glass thermometers containing mercury should be removed from use and disposed of properly in accordance with local, state, and federal laws.

### Vital Signs // Signs // Banners // Stickers // Promotional Items

A single blood pressure measurement that is higher than normal is not necessarily an indication of a problem.
