Portfolio theory to the rescue Portfolio theory tells us not to put all our eggs in one investment basket. But they are also widely interpreted as holding a secondary quality view of colors, i. Meaning there is no guarantee if things go wrong.

What is Color Theory?

One virtue of this account is that, if it is correct, there is no need to agree that science is in conflict with our intuitive notions of color, or that it shows that ordinary color talk is mistaken, or in need of reconstruction. Palmer, a leading psychologist and cognitive scientist, writes: People universally believe that objects look colored because they are colored, just as we experience them. Or even better no gap.
