## The Abolition of Work

There are a minimum of four layers in the production of synthetic gemstones: the jewelry merchant; the producer, who ensures available product for the market; the middleman, who secures the workers, often through debt bondage or an essential analog; and the worker. A researcher in Varanasi described the hierarchy of exploitation as follows: In this set up, it is the master weaver-cum-owner of the loom who is actually exploiting the child worker but he is not the ultimate beneficiary. ### **Child Labour**

Given the large refugee population, issues of birth registration and nationality were of concern, in particular low birth registration rates for Syrian refugee children and Bedouin children. Prabhu, fifteen, was also freed three years ago and saw his earnings quadruple overnight, from nine a day to forty a day. Birth registration of children aged one and more could only be done through a long and expensive judicial procedure? What practical steps had been taken to implement the national plan to protect children affected by armed conflict and to prevent the recruitment of children in armed forces and in domestic and foreign armed groups? The National Authority had the mandate to receive complaints for any human rights violations, to engage in fact-finding, and to contribute to finding a solution.
