How to Breed Platy Fish?

Males have longer fins and females have a red tint to the fins. Feed your female Molly lots of good food including floating flake food and freeze dried blood worms. The males usually try to breed females all the time and keeping more females around the males would render more pregnant females.

How Do Fish Mate: The Ultimate Guide

Squeeze the bag between your fingers to mash the flakes inside the bag into a powder. And if you can ship these oddball fish, then you can really produce a steady income.

Four Aquarium Fish to Breed for Profit

Summary There are a variety of ways that fish mate and reproduce. Make sure you set up the aquarium with live plants, which not only help along the nitrogen cycle, but also help in keeping the water clean of toxins that will accumulate once you add fish to the aquarium. There will always be demand for fish like , , , and other easy to breed fish.

How to Breed Platy Fish?

What is their maximum lifespan? This is when most fish begin to breed in the highest numbers. At that length they will be able to swim fast and avoid being eaten by most of the large fish. Find out things such as temperature, pH ranges, etc.

Breed Tropical Fish: How to breed and raise Zebrafish

We will decide which equipment is necessary when you keep tropical fish and which equipment is voluntary.
