The Impact of Renewable Versus Non

First, use of quality seed potato increases income, due to increased yields, which, in the minds of respondents, plays a major role in their meeting family needs and having a decent family house. Our executive constraints variable reflects the outcomes of most recent elections Glaeser et al. For instance, a discount rate of 4% per year is applied independently of the rate of economic growth, and a remaining lifetime of 20 years and the same elasticity of the cost of extraction are used independently of the type of resource, the country, and the date.

Motivations and Mental Models Associated with Smallholder Farmers' Adoption of Improved Agricultural Technology: Evidence from Use of Quality Seed Potato in Kenya

Cite this article Gasmi, F. The natural capital dependence effect and, when considering long-term horizons, the decrease of human capital, the capital shallowing Solow and the congestion of fixed resources Malthus effects seem to be the most relevant hypotheses through which the role of fertility in economic growth can be examined Ashraf et al.

Motivations and Mental Models Associated with Smallholder Farmers' Adoption of Improved Agricultural Technology: Evidence from Use of Quality Seed Potato in Kenya

There might also be a limit in the maximum usable amount of non-renewable resources due to the constrained planetary capacity to absorb the associated residues. Women wives and land rights in Africa: Situating gender beyond the household in the debate over land policy and changing tenure systems.

The agrarian question, access to land, and peasant responses in Sub

The big five personality factors and personal values.

The agrarian question, access to land, and peasant responses in Sub

Policy Research Working Paper No. Note that the variables used as proxies for a theory may not be individually yet jointly significant. The distinction between renewable and non-renewable natural capital focuses on whether or not the use of resources may be irreversible.

Motivations and Mental Models Associated with Smallholder Farmers' Adoption of Improved Agricultural Technology: Evidence from Use of Quality Seed Potato in Kenya

Societal dependence on natural ecosystems.
