Ultrasonic Algae Control

When algae start to grow in an uncontrolled manner, an increasingly large biomass is formed which is destined to degrade. Anderson DM, Keafer BA, Kulis DM, Waters RM, Nuzzi R 1993 An immunofluorescent survey of the brown tide chrysophyte *Aureococcus anophagefferens* along the northeast coast of the United States.

Nutrients and Eutrophication

Documenting the water quality benefits provided by shellfish aquaculture has increased both communities' and regulators' acceptance of shellfish farming, not only in Connecticut but across the nation. Water Qual 14, 163-165, 1999. Cyanobacteria Cyanobacteria also known as Blue Green Algae Gram-Negative, Photo synthetic, prokaryote found in a variety of habitats such as Fresh, Brackish, marine, hyper saline, volcanic ash, desert sand, rocks and terrestrial environments.

NWQP Research on Harmful Algal Blooms (HABs)

Quilliam MA 1996 Liquid chromatography-mass spectrometry of seafood toxins.

Use of algal assays in studying eutrophication problems

A scientist collects water-quality sample to better understand the role of nutrients in the overabundance of duckweed and algae. Gentien P, Lazure P, Raffin B 1998 Effect of meteorological conditions in spring on the extent of a *Gymnodinium cf. nagasakiense* bloom. The system is can be outfitted to monitor waterways for long-term data collection requiring a certain data set, but may also be deployed at a specified area for more precise data collection, all based on the same operational platform.
