Canadian space milestones

The third is a protein crystal growth experiment.

Canadian space milestones

During the 16-day mission, Williams performs 26 experiments studying the influence of microgravity on the nervous system.

Canadian space milestones

A week later, Robert Stewart resigns for personal reasons. NASA agrees to launch this first Canadian satellite. The 77-year-old Ohio Senator participates in mission STS-95 aboard Shuttle Discovery.

Canadian space milestones

On the same mission, two stranded communications satellites, Palapa B2 and Westar VI, are the first on-orbit spacecraft retrieved by the space shuttle and returned to Earth.
