## Diesel

What can anybody tell me about the TGV? Underframes, grilles and the front access and cab doors were painted Brunswick Green with lettering and lining in Orange.

## GT3

The SNCF French National Railway Society introduced its Turbotrains ETG Element a Turbine a Gaz and RTG Rame a Turbine a Gaz , very noisy passenger units of four to five wagons, in the sixties. An exception would be where the locomotives are only there for a short portion of the trip, e. Only EMD and GE are still producing railroad locomotives.

## Railway

They have also flipped the designation to DASH-8 40B and DASH-8 40C, although many railroads retain the older designation.

## Railway

They soon dropped the logging equipment and built only locomotives, conventional as well as Shays. There are several versions of the TGV SE: 1a.
