Architecture of Rome

In Working Notes of the AAAI Fall Symposium on Rational Agency: Concepts, Theories, Models, and Applications, pages 117-122, Cambridge, MA, November 1995.

Incremental execution of guarded theories, ACM Transactions on Computational Logic (TOCL)

Abstract In AI, the problem of selecting high-level actions in dynamic and not completely pre-dictable environments translates into the problem of designing controllers that can map sequence of observations into actions so that certain goals are achieved. Wooldridge, editors, Foundations and Theories of Rational Agency.

On the Semantics of Deliberation in IndiGolog — from Theory to Implementation

Levesque, Fangzhen Lin, Daniel Marcu, Raymond Reiter, and Richard B. AAAI-97 Workshop, July 28 1997. An incremental interpreter for high-level programs with sensing.

Architecture of Rome

Basically, we imagine a system executing a high-level program with respect to a background theory of action. Annals of Mathematics and Artificial Intelligence, 14:2510-268, September 1995.

Shawqī, Aḥmad 1868

Levesque, ConGolog, a concurrent programming language based on the situation calculus, Artificial Intelligence 121 2000 109—169. They were often oblong or geometric, with three and full of rich golden mosaics. In In Reasoning about Mental States: Formal Theories and Applications, Papers from the 1993 AAAI Spring Symposium, pages 79-85, Stanford, CA, March 1993.

Architecture of Rome

Saitta, editors, Proceedings of the 16th European Conference on Artificial Intelligence ECAI-04 , pages 878-882, Amsterdam, 2004. In Control of the Physical World by Intelligent Systems, Papers from the 1994 AAAI Fall Symposium

On the Semantics of Deliberation in IndiGolog — from Theory to Implementation

How to progress a database and why I: Formal foundations. We develop an account of the kind of deliberation that an agent that is doing planning or executing high-level programs under incomplete information must be able to perform. Temporal reasoning in logic programming: A case for the situation calculus.

Indigolog: Execution of guarded action theories

Whereas the background theory describes the characteristics of the domain action preconditions, action effects and non-effects, etc.
