Metaphysics

Topics in Metaphysics 4 An in-depth study of some central problem, figure, or tradition in metaphysics. Hence, also, provided certain waves reach the eye, we shall see a certain colour, whether the object from which the waves start has any colour or not. Very few philosophers have found the argument of the Meditations convincing, if for no other reason than that very few of them have been convinced by either of the subordinate arguments for the and theists have been hardly less critical of those arguments than atheists.

The Fundamental Problem of Philosophy: Its Point

To say that logic and arithmetic are contributed by us does not account for this. Such philosophers are called 'idealists'. Philosophy is not to be confused with its product.

Philosophy of education

For example, the blue whale, the largest animal on earth, could not survive without the buoyancy provided by the sea. Examples and exercises from a variety of languages. In one sense it must be admitted that we can never prove the existence of things other than ourselves and our experiences.

Suicide: the one truly serious philosophical problem — Camus

The general principles of science, such as the belief in the reign of law, and the belief that every event must have a cause, are as completely dependent upon the inductive principle as are the beliefs of daily life. All such general principles are believed because mankind have found innumerable instances of their truth and no instances of their falsehood. Prerequisites: upper-division standing or consent of instructor. The deflationary theory was held to entail that necessity de re is an incoherent concept.

What is Philosophy?

If such an expansion of size and weight were possible, then the scientific laws of the universe would have to change.

What is Philosophy?

Because God is deep within us, and nobody could copy our Creator, the Omnipotent Being. Whether these results were valid may well be doubted. This is at the heart of the problem of the proper function of government, the power to tax, to conscript, to execute for crimes, and to wage warfare.

Philosophical Problems & Questions

HASS-H; CI-H Introduction to Western philosophical tradition through the study of selected major thinkers such as Plato, Aristotle, Lucretius, Descartes, Hobbes, Leibniz, Locke, Berkeley, Hume, Kant, Nietzsche and Marx. It can be intuitively stated as follows: if x is identical with y, whatever is true of x is true of y and whatever is true of y is true of x. It follows that the American cyclist and mathematician Julia Robinson 1919—85 was necessarily bipedal because she was a cyclist and not necessarily bipedal because she was a mathematician—a contradiction.

The Problems of Philosophy

Subject may be taken repeatedly with the permission of instructor and advisor. His argument concludes with the observation that deceit is an imperfection and hence incompatible with the nature of a perfect being.
