He defines emotional intelligence in terms of self-awareness, altruism, personal motivation, empathy and the ability to and be loved by friends, partners, and family members. Among his contemporaries, he was familiar with Popper but not in any detail with the various strains of logical positivism and logical empiricism, in particular the positions of Carnap and Reichenbach. This book takes a pragmatic look at how to create the space for new possibilities to emerge.

Hence, scientific revolutions have and ought to have brought about epistemological revolutions. A paradigm change typically changes goals, standards, linguistic meaning, key scientific practices, the way both the technical content and the relevant specialist community are organized, and the way scientists perceive the world.
