Cataract surgery complications, side effects and risks

Displacement or dislocation of the intraocular lens implant may rarely occur.

Potential Risks and Complications of Cataract Surgery

As the cataract develops, your lens might even turn brown or yellow. Extracapsular surgery During extracapsular surgery, a longer opening is made on the top part of the eye to remove the hard center of the lens.

Cataract Surgery and Its Complications

Most such cases can be successfully treated. This particular type of IOL is implanted in the eye and then treated with light of a certain wavelength in order to alter the curvature of the lens.

Cataract surgery and its complications (1972 edition)

Postoperative inflammation and corneal edema are rare if surgeons have the expertise and patience.

Cataract surgery and its complications (1972 edition)

A YAG capsulotomy is, however, a factor which must be taken in consideration in the event of IOL replacement as vitreous can migrate toward the through the opening hitherto occluded by the IOL. Sunglasses or eye shields can help protect the eye while it is healing.
