BIM Uses In Design

New specialized areas had developed. It's not always easy, especially in a field like marketing, but I've managed to recognize and change with what's shifting in my field.

Blockchain technology: Is it hype or real in the construction industry?

Finally, 47% of firms surveyed favor a data-centric approach to planning. Edtech Education technology edtech companies develop software and hardware that enhance teaching practices and improve learning outcomes. Several large project developers have already successfully digitized their project-management work flows.

2020 Construction Forecast: Positive momentum to continue, but industry needs to embrace change

That figure is high, and some may be overestimating their ability. And given the varying sophistication levels of smaller construction firms that often function as subcontractors, building new capabilities at scale is another challenge. The Act prohibits accountants from managing and consulting clients whose books they were auditing.

2020 Construction Forecast: Positive momentum to continue, but industry needs to embrace change

Deep rock tunnels for between cities are beginning to receive very serious consideration.

Imagining construction's digital future

A big thank you to the following individuals who took the time to help educate us all: Jill Frey, president of Cummins Facility Services in Prospect,

OH; Mario Levasseur, owner of Empire Maintenance in Montreal, Quebec; Alan Wickstrand, president of Follow Through Cleaning in Portland, Oregon; Mark Malerba, vice president of Metropolitan Maintenance in London, Ontario; Chris Gwin, president of Beelabor Janitorial Services, Inc.

Harvard Design Magazine: Innovate or Perish: New Technologies and Architecture's Future

They can collaborate and work on a model at the same time, in real time.
