Western Oregon

Salem District Inventory The Salem District inventory found four areas, including a total of nine subunits, that possess wilderness characteristics, resulting in a total of 2,624 acres. **Western Oregon Wilderness Characteristic Assessments** As required under FLPMA and current BLM policy, the Bureau recently updated its wilderness characteristics inventories for western Oregon. The remaining areas examined in detail were found to lack wilderness characteristics for a variety of reasons.

Western Oregon

Completed Inventories The Medford District inventory found seven areas that possess wilderness characteristics totaling 85,254 acres.

Zoning and Land Use

In conducting these inventories, the western Oregon districts followed the guidance provided in BLM Manual 6310 —Conducting Wilderness Characteristics

Inventory on BLM Lands. The Greater Sydney Commission's five District Plans are a guide for implementing at a District level. The Coos Bay District inventory found one area that possesses wilderness characteristics totaling 3,048 acres.

District Plans

They inform local environmental plans, community strategic plans and the assessment of planning proposals.

District Plans

In conducting this inventory update, the BLM performed an initial screening to identify all areas that could potentially meet the minimum size criteria. The screening was performed using Geographic Information System GIS data with the following parameters: 1 Spatial identification of BLM-administered lands that potentially met size criteria, 2 Screening such areas for the absence of roads meeting the wilderness inventory road definition using the BLM's Ground Transportation Network GTRN database.
