Learning to Love Growing Old

Critics of raising the earliest eligibility age point to the fact that many people retire at age 62 or earlier not by choice but because they are unable to keep working.

Growing Old or Living Long: Take Your Pick

Figure 36: Gap in provision between receipt of and need for help with daily activities, by income bracket among those aged 65 years and over, 2014, England Source: Health and Social Care Funding explained, The Health Foundation Download this image Figure 36: Gap in provision between receipt of and need for help with daily activities, by income bracket among those aged 65 years and over, 2014, England While the need for social care services at older ages has increased as a consequence of increases in the number of older people, gross real-terms spending on adult social care by local authorities has been steadily declining in recent years 1 while the number of older people receiving publicly-funded social care has declined 2.

Learning to Love Growing Old

The second section covers views on radical life extension by religious affiliation, beliefs and practices. Younger generations grow to resent the older, and vice versa. The feedback form on this page can be used to report content that is not accurate, up-to-date or questionable in any manner.

10 Steps to Healthy, Happy Aging

The number of local authority adult social services jobs, particularly direct care jobs, has also declined 4. Depending upon the support structure at the senior's disposal, she may go extended periods of time without visitors or with little contact to the outside world. Such findings point to the role of motivation in cognitive performance.

The Way Of Living: Being Happy And Healthy At An Old Age

People who stayed in touch with family and friends stayed healthy in their old age.

Comfort Living: Why It Is Okay To Age At Home

About one-in-six report they are lonely or have trouble paying bills. In the former, you would surely miss the bird.

10 Steps to Healthy, Happy Aging

Knowing what mental and physical changes normally occur with age is the first step toward protecting your health. A small but growing gaggle of experts themselves mostly elders—a diverse lot of gerontologists, physicians, psychologists, sociologists, anthropologists, philosophers, ethicists, cultural observers, and leaders—are the vanguard of a movement to change the way society looks at and deals with growing old.
