Principles of Musculoskeletal Tissue Banking

Nevertheless, applying this tissue bank principle, the use of a nonvascularized joint graft is only one salvage solution for an MCP or a PIP joint, to be deliberated upon with a prosthetic solution.

Home

There are no upper age limits for donating your body to science. Temperature records and, if applicable, liquid nitrogen level records shall be available for inspection by the department for the entire period of storage and for one 1 year afterwards. Before donation, all potential donors must undergo strict screening scrutiny that includes physical examination, comprehensive medical history, and social risk review.

Musculoskeletal tissue banking in Europe

The remainder of the clinical studies did not report the bioburden or contamination rate following treatment.

1993 MUSCULOSKELETAL TISSUE BANKING

The Musculoskeletal Tissue Bank The Complex Structure Reconstructive Orthopaedic Surgery and Innovative Techniques - Musculoskeletal Tissue Bank also includes, in addition to the regular hospital structure, the Musculoskeletal Tissue Bank BTM of the Rizzoli Orthopaedic Institute.

The Tissue Bank

The patients' mean age was 59. Results: Among the 159 living donors, 103 64. Height: 163 cm Weight: 55.
