## Online Physical Science Degree Programs & Majors

Instructor s : Peter Littlewood Terms Offered: Winter Prerequisite s : none Note s : PHSC 11600-11700 is an approved two-quarter sequence which will satisfy the general education requirement in the physical sciences.

## Physical Science Activities

This course will feature several observationally-oriented labs that will allow students to directly experience how some of the modern understanding of galaxies has arisen.

## Physical Sciences

The links between physical natural sciences are strong and a subject can belong in both categories.

## Physical Sciences < University of Chicago Catalog

It includes an overview of the physics of the greenhouse effect, including comparisons with Venus and Mars; an overview of the carbon cycle in its role as a global thermostat; predictions and reliability of climate model forecasts of the greenhouse world. The two-year associate physical sciences degree program is built around concentrations in chemistry, biology, analytic geometry and calculus, general physics, and environmental geology. For prospective students considering a degree in the field, developing an understanding of the various educational options is important.

## Outline of physical science

Attendance at Thursday lectures is required.

## Physical Sciences < University of Chicago Catalog

Reines was recognized for discovering the neutrino, a new elementary particle of nature that was thought to be undetectable. The goal of the course will be to use well-understood biological and medical examples to illustrate chemical principles and to give students a toolbox and

techniques to understand molecular systems more broadly.

### **Outline of physical science**

A total of 64 units is required to complete the degree, including upper division electives in the fields of astronomy, physics, chemistry, or earth science. Scripture from the KJV Authorized, 1611 Bible.

### **Difference Between Life Science and Physical Science Difference Between**

Topics will include both non-renewable energy sources fossil fuels and nuclear and renewable energy sources, including electricity production photovoltaics, solar thermal, wind, hydro and geothermal, fuel production solar and biofuels , and energy storage batteries and fuel cells. It is accredited by the Oklahoma State Regents for Higher Education and the Higher Learning Commission. Associate degrees are offered in biology, chemistry, mathematics, physical science, physics, and pre-engineering.
