The Superfund Innovative Technology Evaluation Program SUMMARY AND CLOSURE REPORT

This fact sheet summarizes how environmental practitioners can use CSMs to achieve, communicate, and maintain stakeholder consensus on site understanding, while satisfying the technical and quality objectives required for each stage of a cleanup project's life cycle. Environmental Protection Agency EPA Principles for Greener Cleanups outlines the Agency's policy for evaluating and minimizing the environmental 'footprint' of activities undertaken when cleaning up a contaminated site.

SITE Program Description, Contacts, and Demonstration Program

Finally, the organics are drawn off from the separator, recovered for disposal, or reused off-site in industrial processes. The online version includes new downloadable spreadsheets with the data for several of the key tables and figures in the report. » Open Solicitation The Department of Defense's DoD Environmental Security Technology Certification Program ESTCP released a solicitation on January 7, 2021, requesting pre-proposals for innovative technology demonstrations that address DoD environmental and installation energy requirements as candidates for funding.

FedCenter

A Combined Field and Laboratory Study on Activated Carbon-Based Thin Layer Capping in a PCB-Contaminated Boreal Lake. This document provides sampling guidelines primarily for ground-water monitoring wells that have a screen or open interval with a length of ten feet or less and which can accept a sampling device.

The Superfund Innovative Technology Evaluation Program SUMMARY AND CLOSURE REPORT

They facilitate and encourage the hazardous waste remediation community to share knowledge about, and experiences with, innovative technologies.

SITE DEMONSTRATION BULLETIN

Journal of Soils and Sediments 2020, 20 6 , 2619-2629. This roadmap focuses on optimization of established long-term monitoring programs for groundwater. Similarly, the reuse of graywater can enhance water supply reliability and extend the capacity of existing wastewater systems in growing cities.

EPA Office of Research & Developmnet (ORD) Titles

The sites are located throughout the U. Description: The USEPA conducted an evaluation of the Enhanced In-situ Bioremediation process, a biostimulation technology developed by the USDOE at the Westinghouse Savannah River Plant site in Aiken, SC.

The Superfund Innovative Technology Evaluation Program SUMMARY AND CLOSURE REPORT

Included are references where the reader can find tools and more detailed technical guidance. AML Team Reference Notebook The Abandoned Mine Lands Team Reference Notebook illustrates the extent of abandoned mine lands contamination problems across the U. The primary goal of developing an optimized groundwater monitoring strategy at the FHC Site is to create a dataset that fully supports site management decisions while minimizing time and expense associated with collecting and interpreting data.
