Pope Francis wants psychological testing to prevent problem priests. But can it really do that?

Faculty members, who themselves are usually not trained or competent in the field or have received some baby Church

Filesize: 60.25 MB

degree in pastoral counseling, will sit for hours with a student telling him what his psychological troubles are. He is on the move and not necessarily pastorally engaged in his extensive Parish. Books and articles in the Catholic press have shocked the faithful with lurid accounts of heterodoxy, corruption, and outright immorality festering in the seminaries.

Mental Health

Some of the tests that Millar says she administers are standard psychological instruments, including the Shipley-2 a test of cognitive function, the Minnesota Multiphasic Personality Inventory-2 a set of more than 500 questions that looks for everything from schizophrenia to hypochondria to masculinity and the NEO-PI-3 an assessment of personality traits like neuroticism, extroversion and agreeableness.

Abuse scandals challenge seminarians to strive to be the best priests they can be

In addition to bullying and harassment, there is also a culture of shame and failure when a seminarian is asked to leave or decides to leave. We briefly summarize here key points made by these authors to allow their insights to be applied to the psychology of many American priests.

Pope Francis wants psychological testing to prevent problem priests. But will that work?

Statnick, referring to the Priest-Bishop Relationship, has some very valid insights.
