A Generative Theory of Tonal Music

Just as the field of music theory allowed for an exclusive focus on the formal richness of particular works, the synchronic study of language would reveal that particular languages were tremendously rich and varied. There is a significant difference, but I'll admit that it's one that composers might notice most.

A Generative Theory of Tonal Music

Both methods are based on an iterative approach, where the F0 of the most prominent sound is estimated, the sound is cancelled from the mixture, and the process is repeated for the residual.
