A positive association was found between feminine gender role traits and curiosity, and a negative correlation between this trait and internalizing problem behavior; these associations were independent of the gender of the adolescents and the presence of male role models.

## **Facing the effects of same**

Nearly all considered their mothers good role models. However, there continues to be a dearth of research on gay and lesbian adoptive parents and their children. Family functioning in lesbian families created by donor insemination.

## **Child development outcomes with same**

Take Responsibility: As a parent, you have a choice to overcome your circumstances and work towards creating a healthier emotional situation for your family.

## **Growing Up in a Lesbian Family: Effects on Child Development**

This study examined associations among family type same-sex vs. Overall, supportive coparenting was associated with better child adjustment.

## **Kids Can Thrive with Gay Parents**

Another important area is forensic investigations. Generally, research shows that single parents typically have lower incomes; subsequently, children tend to do poorly in school.

## **Growing up under the Rainbow: A Study of Child Development in Lesbian Households :: Writing Associates Program :: Swarthmore College**

Conclusion: Joint biological parentage, the modal condition for opposite-sex parents but not possible for same-sex parents, sharply differentiates between the two groups on child emotional problem outcomes. Lack of interaction creates further distance between them. Courts often have assumed that lesbian women are emotionally unstable or unable to assume a maternal role.
