Stepping up to the Global Goals

Sharing the benefits of e-commerce.

Your education makes a difference: 4 community benefits of a college degree

Sound multilateral digital rules should be developed to promote mutual trust and win-win cooperation, to ensure openness, stability and security of global ICT industrial and supply chains, in an effort to promote healthy growth of the global economy.

Revolving & Evolving: WeCycle is helping create a sustainable future for West End youth

Governments could look to mobilize stimulus packages that align with global climate goals, responding with renewed vigour in tackling the climate crisis. Planet U: Sustaining the World, Reinventing the University.

Center for Sustainable Communities

Standards are designed to allow flexibility for how they are implemented by individual Schools and administrative departments.

Business Stepping Up: Consulting for Change

Calls are growing for coordinated efforts to embrace best practices for stemming and then reversing the march of the pandemic.

Sustainable Agriculture, CCCC

Orientation to the Community Partner Students may benefit from an orientation to the project and the community with their community partner, whether it is off campus or in a guest lecture. To short circuit the intergenerational downward spiral into deeper poverty that can be aggravated by

climate change impacts, the Bank is planning for new investments in human and social capital focused on health, social resilience and education. Some students felt that this had been a very gradual process and cited their upbringing and backgrounds, others mentioned books or films, and some could even trace their development to a particular critical moment when their whole awareness changed.

Teaching Sustainability

Educators can sometimes add to this sense of threat by taking a moralizing, prescriptive, and unyielding approach to more sustainable lifestyles. Footprint calculations compared over individuals, groups, or entire nations can provide a basis for wide-ranging discussions of inequality in resource use and waste, as well as the cultural, political, and economic systems that structure them. But the amount of un-recyclable waste that your coffee comes in is not.
